LEGEND

Coastal Area

EXPLANATION

The Coastal Area includes the land and waters that have historically been considered wetlands by the community. A number of the areas included in the map were originally part of the wetlands. Activities conducted within the Coastal Area must be consistent with all of the applicable conditions and standards as contained in the Coastal Management Act. Activities conducted within the Coastal Area must be consistent with all of the applicable conditions and standards as contained in the Coastal Management Act.

DATA SOURCES

COASTAL AREA DATA - The Town Boundary data were obtained from the Connecticut Department of Energy and Environmental Protection's Geographic Information System (GIS) database. The data were then used to create a map of the Coastal Area.

BASE MAP DATA - The base map data were obtained from the United States Geological Survey (USGS) National Map Collection.

SCALE FACTOR - The map is intended to be viewed at its original dimensions in order to maintain the 1:5,000 scale. Scale = 1:5,000

SCALE AND MEASUREMENT - The scale of the map is 1:5,000. All measurements and distances shown on the map are based on this scale.

RECALCULATION - The map was recalculated to ensure accurate measurements and distances.
