COASTAL AREA
NORWALK, CONNECTICUT

LEGEND

Coastal Area

EXPLANATION

The Coastal Area includes the land and water that can be affected by the inundation or submersion of the area. This includes coastal features such as bays, estuaries, and beach areas.

DATA SOURCES

COASTAL AREA DATA: The Town Boundary map was used to locate the areas for which the appropriate coastal area was included. The Town Boundary layer was used in the GIS to identify the coastal areas. The Town Boundary layer was created by the Towns of Connecticut.

BASE MAP DATA: The base map was created using the USDA National Agriculture Imagery Program (NAIP) data. The NAIP data was downloaded from the USDA National Agriculture Imagery Program (NAIP) website. The NAIP data was used to create the base map. The NAIP data was downloaded from the USDA National Agriculture Imagery Program (NAIP) website.

SOURCES OF DATA: The Coastal Area data was obtained from the Towns of Connecticut. The Town Boundary data was obtained from the USDA National Agriculture Imagery Program (NAIP) website.

This map is intended to be used at its original dimension to maintain the 1:24,000 scale. (0.4" = 1,000 ft)

ACKNOWLEDGEMENTS

This project was funded by the Coastal Zone Management Program of the U.S. Environmental Protection Agency.
