COASTAL BOUNDARY
DARIEN, CONNECTICUT

LEGEND

EXPLANATION

The coastal boundary map shows the extent of saltmarsh and tidal wetlands within Darien's tidal boundary. The map is based on the observations made during the field mapping project supervised by the Connecticut Department of Natural Resources and Community Development. The map includes the following:

- Coastal Boundary: The extent of saltmarsh and tidal wetlands within Darien's tidal boundary.

DATA SOURCES

COASTAL BOUNDARY DATA: The original boundary data were created in 1979 as a public service using the 1:12,000 scale USGS topographic maps. The final product was produced by the Office of Policy and Management (OPM) using a combination of USGS topographic maps, aerial photography, and field observations. The final product was produced by the Connecticut Department of Natural Resources and Community Development.

BASE MAP DATA: The base map data were created in 1979 as a public service using the 1:12,000 scale USGS topographic maps and field observations. The final product was produced by the Office of Policy and Management (OPM) using a combination of USGS topographic maps, aerial photography, and field observations. The final product was produced by the Connecticut Department of Natural Resources and Community Development.

MAP AND DIGITAL DATA: The data are provided in a digital format in either the 1:12,000 scale (1 meter = 0.3 meter).

This map is intended to be used as an original reference in order to measure the 1:12,000 scale (1 meter = 0.3 meter).
