COASTAL BOUNDARY
ESSEX, CONNECTICUT

EXPLANATION
The coastal boundary map shows the extent of land and shoreline that was surveyed by the Connecticut Department of Energy and Environmental Protection (DEEP) as defined under the Coastal Act of Connecticut. The map includes the coastline between 41°50'00"N and 41°54'00"N and 72°30'00"W and 72°36'00"W as defined in the Coastal Act of Connecticut. The map was prepared by the DEEP Coastal Management Program using 1:24,000-scale U.S. Geological Survey (USGS) topographic maps published between 1969 and 1992. The coastal boundary as explained in the DEEP Coastal Management Program's CT-07 data package was validated with the USGS 1:24,000-scale topographic quadrangle maps published between 1969 and 1992. The final product was compiled using the DEEP Coastal Management Program's CT-07 data package. The map was updated in January 2013. For more information, go to the DEEP website for the digital spatial data shown on this map.

DATA SOURCES

BASE MAP DATA: Based on data originally from 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. The final digital map was produced by the DEEP Coastal Management Program using 1:24,000-scale USGS topographic maps. The data were orthorectified using Lidar (Light Detection and Ranging) data collected by the DEEP Coastal Management Program and are accurate to within one meter. Some areas are subject to natural variations. The map was updated in January 2013.

SHAPES AND DIGITAL DATA: Go to the CT-07 data package for shapes and spatial data. The map does not replace the legal map and was not used for legal determinations.

Potential errors or omissions caused by the nature of the data sources and the processes used. The data are for informational purposes only and should not be used for legal purposes. The map was updated in January 2013. For more information, go to the DEEP website for the digital spatial data shown on this map.
