COASTAL BOUNDARY
OLD SAYBROOK, CONNECTICUT

EXPLANATION

The coastal boundary map shows the extent of land within the coastal zone as defined by the Coastal Zone Management Act of Connecticut. This map is intended to be printed at its original size. The coastal boundary is the line that separates coastal waters from non-coastal waters, as defined by the Coastal Zone Management Act of Connecticut. The coastal boundary is derived from the original 1:12,000-scale coastal zone maps prepared by the Coastal Zone Management Office of the State of Connecticut. The map is printed at its original size to ensure the accuracy of the coastal boundary data.

DATA SOURCES

COASTAL BOUNDARY DATA: The original boundary data were created in 1993 on either side of the Coast Guard Auxiliary, the U.S. Geological Survey, and the State of Connecticut. The original boundary data were then updated in 2000. The updated boundary data were updated in 2014. The data were updated in 2014 for the updated coastal zone maps prepared by the State of Connecticut. The data were updated in 2014 for the updated coastal zone maps prepared by the State of Connecticut.

BASE MAP DATA: Based on data originally from 1:12,000-scale USGS 7.5-minute topographic maps published in 1970 and 1982, the base map information includes soil, landform, and topographic data. The base map information includes soil, landform, and topographic data. The base map information includes soil, landform, and topographic data. The base map information includes soil, landform, and topographic data. The base map information includes soil, landform, and topographic data.
