The coastal boundary map shows the extent of lands and associated coastal waters, as defined by Connecticut General Law §16-91, within Connecticut coastal areas. The coastal boundary is a continuous line delineated on the coastal boundary map for the purpose of protecting the aquatic and coastal resources of the state. The coastal boundary is intended to be used as a planning tool and does not replace the legal maps and data used for legal determinations.

DATA SOURCES

The following sources were used to develop the coastal boundary:

- The coastal boundary map was developed by the Department of Energy and Environmental Protection, Coastal Management Program.
- The data used to develop the map were provided by the U.S. Geological Survey, National Geospatial-Intelligence Agency, and the National Oceanic and Atmospheric Administration.
- The map data were compiled and processed by the Department of Energy and Environmental Protection, Coastal Management Program.

The map is intended to be used as an educational tool and is not to be used for legal determinations.

SCALE AND INCHES / FEET

The map is intended to be used at the following scales:

- 1:24,000 (1 inch = 240 feet)
- 1:12,000 (1 inch = 120 feet)

The map data were compiled and processed by the Department of Energy and Environmental Protection, Coastal Management Program.
