CONTOUR MAP
Bethlehem, CT

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on the Connecticut LiDAR data for the year 2000. The information is only suitable for general planning and informational purposes. It is not intended for exact determinations of elevation where a survey is normally required, or for detailed engineering, building, or design purposes. The Connecticut LiDAR data for 2000 captured ground elevation every 20 feet with an positional accuracy of approximately 3 feet on the ground.

DATA SOURCES
Digital Elevation Model (DEM) surface data: USGS 1:24,000 scale aerial photographic survey, down scaled to 1:24,000 scale, based on the North American Datum of 1983, Lambert Conformal Conic Projection, State Plane Coordinate System of 1983, Zone 3526 data. Visit the CT DEP website to download the base map digital spatial data shown on this map.
