DATA SOURCES

- LiDAR data for the year 2000: This information is only suitable for general planning and information purposes. It is not intended for exact determinations of elevation where a survey is normally required, or for detailed engineering, building, or design purposes.

- Connecticut LiDAR dataset for 2000 captured ground elevation over 2 feet with an elevation accuracy of approximately 3 feet on the ground.

- USGS 1:24,000 topographic maps and digital data.
- Lambert Conformal Conic Projection.

- This map replaces a similar contour map that was dated August 2010.

- Visit the CT ECO website for this map and a variety of others in PDF format.
