CONTOUR MAP

New London, CT

EXPLANATION

Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on the Connecticut 2000 LiDAR data for the year 2000. This information is only suitable for general planning and informational purposes. It is not intended for exact determination of elevation where a survey is normally required, or for detailed engineering, building, or design purposes. The Connecticut LiDAR dataset for 2000 captured ground elevation every 20 feet with vertical accuracy of approximately 3 feet on the ground.

DATA SOURCES

BASE MAP DATA - All data is based on 1:20000 scale and higher geographic surveys, plans and orthophotos. Base map data is up to date as of information from LIDAR data.

STREET DATA - Based on TeleAtlas copyrighted data.

CONTOUR DATA - Derived from a statewide 10-foot Digital Elevation Model (DEM) surface based on the Connecticut 2000 LiDAR ground elevation data. The University of Connecticut Center for Coastal and Marine Studies determined the LiDAR data and carto and it is in public domain. Refer to the Connecticut LiDAR website for more information on LiDAR data.
