CONTOUR MAP
North Haven, CT

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 10 foot contour lines based on the Connecticut Digital Elevation Model (DEM) surface. The Connecticut Digital Elevation Model (DEM) was created in 2000 by the National Elevation Dataset (NED) of the USGS. The DEM data was provided by the Connecticut DEP. The contours were drawn in 2011 by the Connecticut DEP. The map was prepared by the Connecticut DEP in May 2011.

DATA SOURCES
REEF-MAp 2005 - All data is based on a 1,000 foot resolution Digital Elevation Model (DEM) surface created from satellite imagery, LiDAR, and elevation in 2005 by the National Elevation Dataset (NED) of the USGS.

STREET DATA - Based on TeleAtlas copyrighted data.

HEIGHT DATA - Derived from a statewide 10-foot Digital Elevation Model (DEM) surface based on the Connecticut 2008 LiDAR digital elevation data. This data was created by the Connecticut DEP, based on the NED and added 1 ft to SE in data gain with information from contour lines on a 900X LIDAR scale topographic map.

Map and graphic symbols - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

Map prepared by CT DEP, May 2011. This information is not for sale or distribution. The data released here may not be used for a commercial purpose.
