CONTOUR MAP
Granby, CT
(North)

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on the Connecticut LiDAR data for the year 2000. This information is only suitable for general planning and informational purposes. It is not intended for exact determinations of elevation where a survey is normally required, or for detailed engineering, building, or design purposes. The Connecticut LiDAR data for 2000 captured ground elevation over a 20 foot vertical accuracy of approximately 3 feet on the ground.

For unknown reasons, data was collected unevenly in some areas. This resulted in data gaps that affect the overall accuracy of the data. This resulted in data gaps that affect the overall accuracy of the data. The Connecticut LiDAR data for 2000 captured ground elevation over a 20 foot vertical accuracy of approximately 3 feet on the ground.

DATA SOURCES
Base map data is sourced from the Connecticut 2000 LiDAR (Light Detection and Ranging) data. The map displays 20 foot contour lines based on the Connecticut 2000 LiDAR (Light Detection and Ranging) data. The map displays 20 foot contour lines based on the Connecticut 2000 LiDAR (Light Detection and Ranging) data.
