CONTOUR MAP
Kent, CT (North)

EXPLANATION

Contour lines are used to denote elevation above sea level. This map shows 20 foot contour lines based on 1:24,000 LiDAR data for the year 2000. This information is only suitable for general planning and informational purposes. It is not intended for exact determinations of elevation or areas that are to be surveyed or staked. Areas that are delineated by closely spaced contour lines may be suitable for general planning or informational purposes. For unknown reasons, data was collected unevenly in some areas. This resulted in data gaps that affect the overall accuracy of the map. The contour lines represent the ground surface, and do not reflect the effects of ecological or cultural features or any other terrain-related information.

DATA SOURCES

BASE MAP - All data is based on 1:24,000 scale and digital spatial data shown on this map. Street data is derived from recognized data sources.

STREET DATA - Based on TeleAtlas copyrighted data.

BASE MAP DATA - All data is based on 1:24,000 base map digital spatial data shown on this map. Visit the CT DEP website to download the maps and digital data.

CONTOUR DATA - Derived from a statewide 1:24,000 Digital Elevation Model (DEM) surface based on the Connecticut 2000 LiDAR ground elevation data. This data is based on 1:24,000 base map digital spatial data shown on this map. Visit the CT DEP website to download the base map digital spatial data shown on this map.

For unknown reasons, data was collected unevenly on areas that are delineated by closely spaced contour lines. Areas that are delineated by closely spaced contour lines may be suitable for general planning or informational purposes. For unknown reasons, data was collected unevenly in some areas.
