CONTOUR MAP
Killingworth, CT
(North)

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on a statewide LiDAR data for the year 2000. The information is only suitable for general planning and information purposes. It is not intended for exact determinations of elevation where a survey is normally required, or for detailed engineering, building, or design purposes. The Connecticut LiDAR dataset for 2000 captured ground elevation every 20 feet at a horizontal accuracy of approximately 3 feet on the ground.

DATA SOURCES
- Map Displayed: 20 foot Contour lines
- Data Source: Connecticut LiDAR
- Map Scale: 1:24,000
- Basemap: Connecticut 2000 LiDAR ground elevation base map digital spatial data shown on this map.

CONTOUR DATA - Derived from a statewide 10-foot Digital Elevation Model (DEM) surface based on the Connecticut 2000 LiDAR dataset digital spatial data shown on this map.

STREET DATA - Based on Trademark copyrighted data by the Connecticut State Department of Transportation.

MAP PREPARED BY CT DEP - This map was produced by the Connecticut Department of Environmental Protection, Office of Environmental Data and Information, 2010.
