**CONTOUR MAP**
Norfolk, CT (North)

**DATA SOURCES**
LIDAR data for the year 2000. This information is only suitable for general planning and informational purposes.

**EXPLANATION**
Contour lines are used to denote elevation above sea level. For unknown reasons, data was collected unevenly in some areas. This resulted in data gaps that affect the overall quality of the map. These gaps are characterized by widely spaced contour lines, while steep slopes are represented by closely spaced contour lines. Contour lines that cross streams flowing through areas of water will form a V-shape, with the apex of the V pointing upstream.

**BASE MAP DATA**
All data is based on 1:24,000 scale topographic maps. Land Use Education and Research (CLEAR) created the DEM and edited it to fill in data gaps with the Connecticut State Plane Coordinate System of 1983, Zone 3526 data.

**STREET DATA**
Based on TeleAtlas copyrighted data.

**THE UNIVERSITY OF CONNECTICUT CENTER FOR LAND USE EDUCATION AND RESEARCH**

**NEIGHBORING TOWNS**
Norfolk, Canaan, Colebrook, North Canaan, Winchester, New Hartford, Willington, Coventry, Hebron.
