CONTOUR MAP
Stratford, CT (North)

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on data from the Connecticut 2004 LiDAR data. The differences in LiDAR data are due to changes in the landscape such as cut slopes, earth moving projects, and natural erosion. The LiDAR data is not intended for exact determinations of elevation where accuracy is normally required, or for detailed engineering, building, or design purposes.

DATA SOURCES
BASE MAP DATA - All data is based on 1:24,000-scale USGS topographic quadrangle maps and digital files. LiDAR data is provided by TERRASENSUS, CT DOT and data from the state landfill. Additional data is available at the University of Connecticut, Center for Land Use Education and Research (CLEAR) website.
