This is a contour map of Sharon, CT (Northeast). Contour lines are used to denote elevation above sea level. The map displays 20 foot contour lines based on the Connecticut 2001 United States National Geodetic Vertical Datum (USNGVD) data for the year 2000. This information is only suitable for general planning and information purposes. It is not intended for exact determinations of elevation where a survey is normally required, or for detailed engineering, building, or design purposes. The Connecticut LISMM dataset for 2001 captured ground elevation over 20 feet with an horizontal accuracy of approximately 3 feet on the ground.

For unknown reasons, data was collected unevenly in some areas. This resulted in data gaps that affect the accuracy of the contour lines on this map. With this information, a general sense of the topography can be determined. Various slopes are characterized by widely spaced contour lines, while steep slopes are represented by closely spaced contour lines. Contour lines that cross streams following the general direction of water flow will form a V-shaped deflection with the apex of the V pointing upstream.

**STREET DATA** - Based on TeleAtlas copyrighted data.

**DATA SOURCES**

- **NSSM MAP 2001**: All data is based on a 1:24,000 scale digital elevation model (DEM). This data was generated from historical topographic maps and national aeronautical charts of the USA. This includes contour lines for the stated elevation above sea level.
- **NSSM MAP 2003**: All data is based on a 1:24,000 scale digital elevation model (DEM). This data was generated from historical topographic maps and national aeronautical charts of the USA. This includes contour lines for the stated elevation above sea level.

**STATE OF CONNECTICUT**

- **MAPPING** - Connecticut Mapping Program - Geographic Information System (GIS) - A statewide data collection and mapping effort. (Hartford: Department of Agriculture, Natural Resources, and Community Development, 2000)

**CLEAR**

- **OVERALL DATA SOURCES** - GIS data includes historical and current aerial photography, land use data, topographic data, and other geographic data.

Map prepared by CTDEP 2005. This map is not intended for surveying purposes. This map is not intended for surveying purposes. This map is not intended for surveying purposes.
