CONTOUR MAP
Newtown, CT (Northwest)

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on the Connecticut LiDAR data for the year 2000. The information is only suitable for general planning and informational use and is not intended for exact determinations of elevation where a survey is normally required, or for detailed engineering, building, or design purposes. The Connecticut LiDAR dataset for 2000 captured ground elevation every 20 feet at an theoretical accuracy of approximately 3 feet on the ground.

DATA SOURCES
DATA SOURCES - Derived from a statewide 10-foot Digital Elevation Model (DEM) surface based on the Connecticut 2000 LiDAR DEM data. This map is sponsored by Norwalk CT and published by the Connecticut Geographic Information System (CTGIS) with information from the Connecticut Digital Database of Orthophotos.

CONTOUR MAP - All data is based on a 1:24,000 scale and depicts geographic names, roads and highways, water features, and hydrography. Base map data is from the Connecticut Geographic Information System (CTGIS) with information from the Connecticut Digital Database of Orthophotos.

WEB MAP SERVICE 2010 - Visit the CT GIS website for this map and a variety of others in PDF format. Visit the CT GIS website to download the base map digital spatial data shown on this map.
