CONTOUR MAP
Union, CT

EXPLANATION

Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on the Connecticut LiDAR data for the year 2000. This information is only suitable for general planning and informational purposes; it is not intended for exact determinations of elevation where a survey is normally required, for detailed engineering, building, or design purposes. The Connecticut LiDAR data for 2000 captured ground elevation every 20 feet at a horizontal accuracy of approximately 3 feet on the ground.

For unknown reasons, data was collected unevenly in some areas. This resulted in data gaps that affect the overall quality of the map. This resulted in data gaps that affect the overall quality of the map and caused the overall quality of the map to be neither current nor complete. For unknown reasons, data was collected unevenly in some areas. This resulted in data gaps that affect the overall quality of the map. This resulted in data gaps that affect the overall quality of the map and caused the overall quality of the map to be neither current nor complete.

DATA SOURCES

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.

BASE MAP DATA - All data is based on 1:24,000 scale U.S. Geological Survey products. These products represent roads, airports, and hydrography. Base map data is reflected corrected complete.
