CONTOUR MAP
Haddam, CT
(West)

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 25 foot contour lines based on Connecticut LiDAR data for the year 2000. This information is only suitable for general planning and informational purposes. It is not intended for exact determinations of elevation where accuracy is normally required, or for detailed engineering, building, or design purposes. The Connecticut LiDAR data for 2000 captured ground elevation over 24 feet with horizontal accuracy of approximately 5 feet on the ground.

DATA SOURCES

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and airports, and hydrography. Base map data is neither current nor complete.

STREET DATA - Based on TeleAtlas copyrighted data.

CONTOUR DATA - Derived from a statewide 10 foot Digital Elevation Model (DEM) surface based on the Connecticut 2000 LiDAR elevation data. The University of Connecticut, Center for Geospatial Technology, produces the DEM and called it to ESRI data gain with information from overhead data in a 1:24,000 scale topographic map.

Map prepared by CT DEP, May 2011.

Map updated June 2012 - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
