CONTOUR MAP
New Hartford, CT (West)

EXPLANATION
Contour lines are used to denote elevation above sea level. This map displays 20 foot contour lines based on the Connecticut DEM data for the year 2006. The information is only suitable for general planning and informational purposes. It is not intended for exact determinations of elevation where a survey is required, or for detailed engineering, building, or design purposes. The Connecticut DEM data for 2006 captured ground elevation over 20 feet at a horizontal accuracy of approximately 3 feet on the ground.

For recent years, data was collected annually to some areas. This resulted in data gaps that affect the overall accuracy and resolution of these contour lines. With this information, a general sense of the site can be assessed. Close contour lines are characterized by widely spaced contour lines, while steep slopes are represented by closely spaced contour lines. Contour lines that cross streams flowing through areas of noticeable relief will form a V-shaped deflection with the apex of the V pointing upstream.

DATA SOURCES
DEM Map 100X - All data is based on 1/20,000 scale and thematic geographic names, shown and interpreted are based on the Connecticut 2006 DEM (Digital Elevation Model) and includes derived data from various sources including the USGS, and other contributors. The DEM data is displayed at a 1/30,000 scale plus elevation data with information from the DEM GIS database.

Street Data - Based on Teladat copyrighted data
Contour Data - Derived from the Connecticut 100X Digital Elevation Model (DEM) and includes data from the Connecticut DEM GIS database.

Map created by CT GIS May 2007. The information presented on this map is derived from DEM data and other data sources. The map is for informational use only. This map is not intended to be used for engineering, building or design purposes. The information on this map is for general planning and educational purposes only. It is not intended for legal, design, or engineering purposes. The use of this information is at the user's own risk.
