DEPARTMENT OF ENERGY & ENVIRONMENTAL PROTECTION

PLAINFIELD, CONNECTICUT

LEGEND

DATA SOURCES

DEP PROPERTY RLCS - This map is based on information from the Connecticut Department of Energy & Environmental Protection (DEP). RLCS is used by DEP to identify parcel boundaries and the type of land use associated with the parcels. RLCS data includes information on property owner name, property name, and land use codes. RLCS data is maintained by the CT DEEP Property Information System (PIS). RLCS data is updated on an annual basis.

DEP ENVIRONMENTAL DATA - This map is based on information from the Department of Energy & Environmental Protection (DEP). DEP environmental data includes information on land use, geographic names, and geographic places. DEP environmental data is maintained by the DEP Environmental Information System (EIS). DEP environmental data is updated on an annual basis.

DEP HYDROGRAPHIC DATA - This map is based on information from the Department of Energy & Environmental Protection (DEP). DEP hydrographic data includes information on waterbodies, flood control areas, and fish hatcheries. DEP hydrographic data is maintained by the DEP Hydrographic Information System (HIS). DEP hydrographic data is updated on an annual basis.

DEP LAND RECORDS DATA - This map is based on information from the Department of Energy & Environmental Protection (DEP). DEP land records data includes information on land ownership and land use. DEP land records data is maintained by the DEP Land Records Information System (LIS). DEP land records data is updated on an annual basis.

DEP PROPERTY DATA - This map is based on information from the Department of Energy & Environmental Protection (DEP). DEP property data includes information on land ownership and land use. DEP property data is maintained by the DEP Property Information System (PIS). DEP property data is updated on an annual basis.

All DEEP owned property is meant to be included on this map; however, there are exceptions. Visit the DEEP website for additional information.

EXPLANATION

The map is based on data created by the Connecticut Department of Energy & Environmental Protection (DEP). The map was created using data from the DEP Property Information System (PIS), DEP Environmental Information System (EIS), and DEP Hydrographic Information System (HIS). The map includes information on land ownership, land use, geographic names, and geographic places. The map was created using the ArcGIS Desktop software and the CityEngine plugin.
