Some of the parcel boundaries were created using the USGS used to create the digital data. The source maps are in a variety of acquisition history for each parcel, and contain the maps that were land records. The land records include information about the buildings, dams and dam control structures, parking lots, DEEP sanctuaries, wildlife management areas, water access areas and

This map identifies parcels of land that are owned by the

Wildlife Sanctuary

Historic Preserve

Hatchery

This map contains an area that is managed for flood control and that generally contains dams and related structures and impoundment and Hopeville Pond in Griswold.

Sanctuary in Farmington.

An area where wildlife habitat is managed to maintain stable, healthy populations of wildlife. Hunting and trapping is

An area that has historic significance. One example is Industrial Monument Historic Preserve in North Canaan that contains the state's last remaining iron furnace.

An area that is managed for flood control and that generally contains dams and related structures and impoundment.
