The primary ground elevation data source was LiDAR data created by Terrapin LLC for FEMA. That data was supplemented where needed by ground surface LiDAR data created by Terrapin LLC for the State of Connecticut. The vertical accuracy of all LiDAR data is approximately +/- 1 foot, and the horizontal accuracy is approximately +/- 3 feet.

The horizontal projection of this map is Connecticut State Plane NAD83 feet. All elevation data was referenced to the NAVD88 vertical datum.
