This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5-Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter of a 15-minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during fair weather conditions and the ground resolution for the imagery is 3.28 feet (1 meter) per image pixel. This aerial orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete.
