1990 Orthophotography
Bethlehem, CT

EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 U.S.G.S. 7.5 Minute Digital Orthoimage Quarter Quadrangle (DOQQs), which cover one quarter the area of a U.S.G.S. 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 1.3 feet (0.4 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match the street layer. Due to changes in the major interstates, US routes, state routes, streets, railroads, and airports, shape of features in other GIS data may not exactly match

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 7.5 Minute Digital Orthoimage Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic features, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Street data is based on USGS 1:24,000 topographic data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
