EXPLANATION
This map displays 1990 black and white orthophotography based on the 1980 U.S.G.S. 7.5 minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a U.S.G.S. 1 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Structure-based data such as buildings, streets, parks, and boundaries are displayed. Due to changes in the location and names of streets, errors in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1980 7.5 minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a U.S.G.S. 1 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic features, places and their symbols, town boundaries, railroads, and airports. These map datums are neither current nor complete. Some data is based on historic surveyed data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP site to download the base map digital symbol data shown on this map.
