DATA SOURCES

Map prepared by CT DEP, December 2010.

1990 Orthophotography
Colebrook, CT (East)

EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 7.5 minute orthographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resulution for the imagery is 3.28 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as minor streets, US roads, state roads, streams, railroads, and ferry crossings are displayed. Due to changes in the ground and names of streams, streets in the orthophotographs may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 7.5 Minute Digital Orthophoto Quarter Quadrangles (DOQQs) which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale topographic maps and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is newer, some not complete. Street data is based on USGS 1:24,000-scale data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
