EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 U.S.GS 3.75° Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 1:15,000 topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.28 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced as some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as major interstates, US routes, state routes, railroads, and ferry crossings are displayed. Due to changes in the information shown in the photos, street-level data such as beds, schools, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAHY - Orthophotography is provided by the USGS and is based on 1990 3.75 Minute Digital Orthophoto Quarter Quadrangle (DOQQs) which cover one quarter the area of a USGS 1:15,000 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic location, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Street data is based on the 1990 Census snap shot data.

MAPS AND DIGITAL DATA - Visit the CTDEP website for this map and a variety of others in PDF format.  Visit the CTDEP website to download the base map digital spatial data shown on this map.
