This map displays 1990 black and white orthophotography based on the 1981 USGS 7.5 minute Digital Orthophoto Quarter Quadrangle (DOQQ), which covers one quarter the area of a USGS 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during peak conditions and the general resolution for the imagery is 3.28 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match annotation shown in the photo. Non-photographic data such as major subdivisions, US roads, state routes, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, errors in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1981 USGS Digital Orthophoto Quarter Quadrangle (DOQQ), which covers one quarter the area of a USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Base map data is neither current nor complete. Source data is based on USGS topographic maps.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

EXPLANATION
