This map displays 1990 black and white orthophotography based on the 1990 USGS 1:7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter of the area of a USGS 1:24,000 topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the general resolution of the imagery is 0.25 feet (0.08 meters) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Shown on the map are hospitals, educational facilities, train stations, and town parking lots. Also shown are airports, locations and names of streets, streets in the orthophoto information shown in the photos. Street-level data such as shape of features in other GIS data may not exactly match data on this map.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 1:7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQs) which cover one quarter of the area of a USGS 1:24,000 topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, terrain boundaries, railroads, and airports. Some map data is neither current nor complete. Street data is based on the base map digital data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others or PDF format. Visit the CT DEP website to download the base map digital data shown on this map.
