This map displays 1990 black and white orthophotography based on the 1984 U.S.G.S. 7.5 minute Digital Orthoimage Quadrangle (DOQQ) which covers one quarter of a U.S.G.S. 7.5 minute topographic quadrangle. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.26 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match this imagery. Stripped data such as major interstates, U.S. routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in location and names of streets, streets in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the U.S.G.S and is based on 1984-1987 Maine Digital Orthoimage Quadrangle (DOQQ) which covers one quarter of a U.S.G.S. 7.5 minute topographic quadrangle.

BASE MAP DATA - All data is based on 1996-1997 Maine Digital Orthoimage Quadrangle (DOQQ) which covers one quarter of a U.S.G.S. 7.5 minute topographic quadrangle.
