EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USDA 7.5-minute Digital Orthophoto Quarter Quadrangles (DOQQs), which cover one quarter of a U.S.GS 7.5-minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced as some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match the imagery shown in the photos. Mosaic orthophoto data such as major interstates, US roads, state roads, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophotographs may not match the street layout. Also shown are airports, hospitals, educational facilities, train stations, and towns boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USDA and is based on 1990 USDA 7.5 Minute Digital Orthophoto Quarter Quadrangles (DOQQs) which cover one quarter of a U.S.GS 7.5-minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is not the most current complete. Street data is based on 1990 aerial photography data.

MAPS AND DIGITAL DATA - Visit the CTDEP website for this map and a variety of others in PDF format. Visit the CTDEP website to download the base map digital copydata shown on this map.
