This map displays 1990 black and white orthophotography based on the 1990 U.S. 1:75 Minute Digital Orthophoto Quarter Quadrangle (DOQQ), which covers one quarter the area of a U.S.G.S. 7' minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Spatial and attribute data such as major interstates, US roads, state roads, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophoto may not match the street layers. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 1:75 Minute Digital Orthophoto Quarter Quadrangle (DOQQ), which covers one quarter the area of a U.S.G.S. 7' minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is not current or complete. Recent data is based on U.S.G.S. Digital Orthophotography data.

MAPS AND DIGITAL DATA - Visit the CTEDO website for this map and a variety of others in PDF format. Visit the CTEDO website to download the base map digital data shown on this map.
