EXPLANATION
This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced as some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, errors in the orthophotos may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS 7.5 Minute Digital Orthophoto Quarter Quadrangles (DOQQs) which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. More maps display road center line complete. Street data is based on 2004/2005 state data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others or PDF format. Visit the CT DEP website for downloads like base map digital symbol data shown on this map.
