This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 minute digital orthophoto quarter quadrangle (DOQQ), which covers one quarter of a USGS 7.5 minute topographic quadrangle. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry connections are displayed. Due to changes in the location and names of streets, streams in the orthophotos may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS 7.5 minute digital orthophoto quarter quadrangle (DOQQ) which covers one quarter of a USGS 7.5 minute topographic quadrangle map.

BASE MAP SOURCES - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Some map data is not updated or contains errors. Street data is based on 1990 orthophotographic data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital symbol data shown on this map.
