1990 Orthophotography
Wallingford, CT
(Northeast)

EXPLANATION
This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5-Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during head-on conditions and the ground resolution for the imagery is 3.28 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match those shown in the photos. Mosaic level data such as major interstates, US routes, state routes, streets, railroads, and ferry connections are displayed. Due to changes in the location and names of streets, streets in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS Digital Orthophoto Quarter Quadrangle (DOQQs) which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale U.S. Geological Survey topographic maps and 1:24,000-scale U.S. Geological Survey aerial photography. Town and town boundaries are not complete. Town data is based on Town Hall records of parcel data.

MAPS AND DIGITAL DATA - Visit the CT DCP website for this map and a variety of others in PDF format. Visit the CT DCP website to download the base map digital symbol data shown on this map.
