1990 Orthophotography
Mansfield, CT
(Northwest)

EXPLANATION
This map displays 1990 black and white orthophotography
based on the 1990 U.S.G.S. 7.5 minute Digital Orthophoto
Quarter Quadrangle (DOQQs), which cover one quarter
the area of a U.S.G.S. 7.5 minute topographic quadrangle
map. The photographs were taken in the Spring of 1990
during leaf-off conditions and the ground resolution for
the imagery is 3.28 feet (1 meter) per image pixel. This
statewide orthophotography is not color balanced as some
areas may be darker than others. Also, the location and
shape of features in other GIS data may not exactly match
information shown in the photos. Street-level data such as
major interstates, US routes, state routes, streets, railroads,
and ferry crossings are displayed. Due to changes in the
location and names of streets, streets in the orthophoto
may not match the street layer. Also shown are airports,
hospitals, educational facilities, train stations, and town
boundaries. Important geographic locations and
waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 7.5
Minute Digital Orthophoto Quart Quadrangle (DOQQs) which cover one quarter the area of a
U.S.G.S. 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and
their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete.
Street data is based on United States Census data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF
format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

Protect from light and moisture. Map is not colorfast.
