This map displays 1990 black and white orthophotography based on the 1990 USGS 1.77 Minute Digital Orthophoto Quarter Quadrangle (DOQQ), which cover one quarter the area of a USGS 7.5-minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.28 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match the photos. Street-level data such as minor interstates, US routes, state routes, railroads, and ferry crossings are displayed. Due to changes in the major interstates, US routes, state routes, streets, railroads, and hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 1.77 Minute Digital Orthophoto Quarter Quadrangle (DOQQ), which cover one quarter the area of a USGS 1.77 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the mentoring website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
