This map displays 1990 black and white orthophotography based on the 1989 USGS 1:75,000 Digital Orthophoto Quarter Quadrangle (DOQQ), which covers the area of a USGS 7.5 minute topographic quadragle map. The photographs were taken in the Spring of 1989 during clear conditions and the general resolution (for the imagery) is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Vectorized data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, errors in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is Provided by the USGS and is based on 1989 1:75 Minute Digital Orthophoto Quarter Quadrangle (DOQQ), which covers the area of a USGS 7.5 minute topographic quadragle map.

BASE MAP DATA - All data is based on 1:12,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Street data is based on Town Level topographical data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital data shown on this map.

EXPLANATION
