1990 Orthophotography
Cheshire, CT
(South)

EXPLANATION
This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 Minute Digital Orthoimage
Quarter Quadrangle (DOQQ), which covers one quarter of the area of a USGS 7.5 minute topographic quadrangle map. The photographs
were taken in the Spring of 1990 during cloud-free conditions and the ground resolution for the imagery is 3.28 feet (1 meter) per image
grid. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and
shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as
major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the
distance and names of streets, streets in the orthophotography may not match the street layer. Also shown are airports,
hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and
waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 7.5
Minute Digital Orthoimage Quarter Quadrangle (DOQQ), which covers one quarter of the area of a
USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic names, places and
their symbols, towns boundaries, railroads, and airports. Some map data is neither current nor complete.
Street data is based on 1990 orthophotography data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF
format. Visit the CT DEP website to download the base map digital symbol data shown on this map.
