DATA SOURCES
Map prepared by CT DEP, December 2010.

EXPLANATION
This map displays 1990 black and white orthophotography based on the 1990 USGS 7.75 Minute Digital Orthophoto Quarter Quadrangle (DOQQs) which cover one quarter the area of a USGS 7.75 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.28 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match the street layer. Important geographic locations and names of streets, streets in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 3.75 Minute Digital Orthophoto Quarter Quadrangle (DOQQs) which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map. All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Street data is based on TeleAtlas copyrighted data. Street-level data such as hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, towns boundaries, railroads, and airports. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
