This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This state-wide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match annotations shown in the photos. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophotos may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS 7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. More map data is available from the Connecticut Department of Energy and Environmental Protection.
