EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 minute Digital Orthophoto Quarter Quadrangles (DOQQs), which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during fair weather conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Structural data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophotos may not match the street names. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS 7.5 minute Digital Orthophoto Quarter Quadrangles (DOQQs), which cover one quarter the area of a USGS 7.5 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. These map data is neither current nor complete. Base data is based on USGS copyrighted data.

MAPS AND DIGITAL DATA - Visit the CTDEP website for this map and a variety of others in PDF format. Visit the CTDEP website to download the base map digital data shown on this map.
