EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USGS 7.75-Minute Digital Orthophoto Quarter Quadrangles (DOQQs), which cover one quarter the area of a USGS 7.5-minute topographic quadrangle map. The photographs were taken in Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the major interstates, US routes, state routes, streets, railroads, and airports. Base map data is neither current nor complete. Orthophotography is provided by the USGS and is based on 1990 3.75 Minute Digital Orthophoto Quarter Quadrangles (DOQQs) which cover one quarter the area of a USGS 1:24,000 scale topographic quadrangle map. ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 3.75 Minute Digital Orthophoto Quarter Quadrangles (DOQQs) which cover one quarter the area of a USGS 1:24,000 scale topographic quadrangle map. DATA SOURCES BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Base map data is neither current nor complete. Street data is based on USGS 1990 orthophotography data. MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital symbol data shown on this map.
