This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5' Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter of the area of a USGS 1:24,000 scale topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.28 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match those in the photos. Street-level data such as street names, hospitals, educational facilities, train stations, and town boundaries are displayed. Due to changes in the information shown in the photos, street-level data such as street names, hospitals, educational facilities, train stations, and town boundaries may not exactly match those in other GIS data. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS 7.5' Minute Digital Orthophoto Quarter Quadrangle (DOQQs), which cover one quarter of the area of a USGS 1:24,000 scale topographic quadrangle map.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Street map data is neither current nor complete. Street data is based on 1990 USGS copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital symbol data shown on this map.
