EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USDA 7.5 minute Digital Orthophoto Quarter Quadrangles (DOQQs), which cover one quarter the area of a USDA 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the general resolution for the imagery is 2.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match those shown in this photo. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophoto may not match the street layout. Also shown are airports, hospitals, educational facilities, railroads, and airports. More information and symbols are displayed. Important geographic locations are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USDA and is based on the 1990 USDA 7.5 minute Digital Orthophoto Quarter Quadrangles (DOQQs) which cover one quarter the area of a USDA 15 minute topographic quadrangle map.

BASE MAP DATA - All data is based on 1:2,400-scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. More information and symbols are displayed. Street data is based on 1:24,000-scale data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
