This map displays 1990 black and white orthophotography, based on the USGS 1:7.5-minute Digital Orthoimage Quarter Quadrangle (DOQQ), which cover one quarter the area of a USGS 1:24,000 topographic quadrangle map. The photographs were taken in the spring of 1990 during leaf-off conditions and the ground referenced for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos.矢量数据, such as major intersections, US routes, state routes, trains, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and towns. Important geographic locations and waterbodies are labeled.

DATA SOURCES
- ORTHOPHOTOGRAPHY: Orthophotography is provided by the USGS and is based on 1990 1:7.5 Minute Digital Orthoimage Quarter Quadrangle (DOQQs) which cover one quarter the area of a USGS 1:24,000 topographic quadrangle map.
- BASE MAP DATA: All data is based on 1:24,000-scale USGS and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Some data is based on 1990 USGS topographical data.
