1990 Orthophotography West Haven, CT

EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USDA 7.5-minute Digital Orthoimage Quarter Quadrangles (DOQQs), which cover one quarter the area of a USDA 1:24,000-scale topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry connections are displayed. Due to changes in the location and names of streets, streets in the orthophotograph may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USDA and is based on 1990 USDA 7.5-minute Digital Orthoimage Quarter Quadrangles (DOQQs) which cover one quarter the area of a USDA 1:24,000-scale topographic quadrangle map.

BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic names, places and their symbols, school boundaries, roads, and airports. These map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.
