1990 Orthophotography
Brooklyn, CT
(West)

EXPLANATION

This map displays 1990 black and white orthophotography based on the 1990 USGS 7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQ) images taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel. This statewide orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match annotations shown in the photos. Noticeable data such as major waterbodies, US roads, state routes, streets, railroads, and ferry crossings are displayed. Due to changes in the location and names of streets, streets in the orthophotograph may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and towns. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1990 USGS 7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQ) images taken in the Spring of 1990 during leaf-off conditions and the ground resolution for the imagery is 3.25 feet (1 meter) per image pixel.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns boundaries, railroads, and airports. Some map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.
