1990 Orthophotography
Haddam, CT (West)

EXPLANATION
This map displays 1990 black and white orthophotography based on the 1989 USGS 1:7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQQ), which covers one quarter of a USGS 7.5 minute topographic quadrangle map. The photographs were taken in the Spring of 1990 during leaf-off conditions and the ground resistance for the imagery is 3.28 feet (1 meter) per image pixel. This orthophotography is not color balanced so some areas may be darker than others. Also, the location and shape of features in other GIS data may not exactly match information shown in the photos. Multi-level data such as major structures, US roads, state roads, streets, railroads, and ferry crossings are displayed. Due to changes in vegetation the location and names of streets, streets in the orthophoto may not match the street layer. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Orthophotography is provided by the USGS and is based on 1989 1:7.5 Minute Digital Orthophoto Quarter Quadrangle (DOQQQ) which covers one quarter of a USGS 7.5 minute topographic quadrangle map.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, railroads, and airports. Some map data is neither current nor complete. Street data is based on USGS copyright expired data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DGP website to download the base map digital symbol data shown on this map.

North American Datum of 1983
